DETAILED ACTION

Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:
The specification to which the oath or declaration is directed has not been adequately identified. See MPEP § 601.01(a).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 18, 19, 22, 23, and 27 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Uchida, et al., in col. 11, line 63, and col. 12, lines 17-24.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 21 is rejected under 35 U.S.C. 103(a) as being unpatentable over Uchida, et al.

Uchida discloses the claimed invention except for a multipolar magnet. The examiner takes official notice it would have been obvious to one having ordinary skill in the art at the time the invention was made to dispose Uchida's permanent magnet with a multipolar profile.

Allowable Subject Matter

6. Claims 1-17, 24-26, 28 and 29 are allowed.
7. Claim 20 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
8. The following is a statement of reasons for the indication of allowable subject matter: Uchida, et al., the closest prior art of record failed to disclose or teach an embodiment including the combination of 0.03% to 0.25% by weight of Zr and 2000 ppm or less of oxygen, nor wherein Nb is dispersed in the main phase and the grain boundary phase of said sintered body, and Zr is dispersed in the grain boundary phase of said sintered body.
